# Forward Looking Statements

This Annual Report on Form 10-K (Form 10-K) contains forward-looking statements. These forward-looking statements represent our expectations or beliefs concerning future results, and it is possible that the results described in this Form 10-K will not be achieved. These forward-looking statements can generally be identified by the use of statements that include words such as “estimate,” “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “foresee,” “likely,” “will,” “goal,” “target” or other similar words or phrases. All forward-looking statements are based upon information available to us as of the date they are made. These forward-looking statements describe risks, uncertainties and other factors, many of which are outside of our control, that could cause actual results to differ materially from the results discussed in the forward-looking statements, including, among other things, the matters discussed in this Form 10-K in the section captioned “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” Additional information about factors that could lead to material changes in performance is contained in Part I, Item 1A— Risk Factors of this Form 10-K. These factors are not intended to be an all-inclusive list of risks and uncertainties that may affect the operations, performance, development and results of our business, but instead are the risks that we currently perceive as potentially being material. Such factors may include: (i) economic changes nationally or in local markets, changes in consumer confidence, declines in employment levels, inflation or increases in the quantity and decreases in the price of new homes and resale homes on the market; (ii) the cyclical nature of the homebuilding industry and a potential deterioration in homebuilding industry conditions; (iii) factors affecting margins, such as decreased land values underlying land option agreements, increased land development costs on communities under development or delays or difficulties in implementing initiatives to reduce our production and overhead cost structure; (iv) the availability and cost of land and the risks associated with the future value of our inventory, such as additional asset impairment charges or write-downs; (v) shortages of or increased prices for labor, land or raw materials used in housing production, and the level of quality and craftsmanship provided by our subcontractors; (vi) estimates related to homes to be delivered in the future (backlog) are imprecise, as they are subject to various cancellation risks that cannot be fully controlled; (vii) a substantial increase in mortgage interest rates, increased disruption in the availability of mortgage financing, a change in tax laws regarding the deductibility of mortgage interest for tax purposes or an increased number of foreclosures; (viii) our cost of and ability to access capital, due to factors such as limitations in the capital markets or adverse credit market conditions, and otherwise meet our ongoing liquidity needs, including the impact of any downgrades of our credit ratings or reductions in our tangible net worth or liquidity levels; (ix) our ability to reduce our outstanding indebtedness and to comply with covenants in our debt agreements or satisfy such obligations through repayment or refinancing; (x) increased competition or delays in reacting to changing consumer preferences in home design; (xi) weather conditions or other related events that could result in delays in land development or home construction, increase our costs or decrease demand in the impacted areas; (xii) estimates related to the potential recoverability of our deferred tax assets, and a potential reduction in corporate tax rates that could reduce the usefulness of our existing deferred tax assets; (xiii) potential delays or increased costs in obtaining necessary permits as a result of changes to, or complying with, laws, regulations or governmental policies, and possible penalties for failure to comply with such laws, regulations or governmental policies, including those related to the environment; (xiv) the results of litigation or government proceedings and fulfillment of any related obligations; (xv) the impact of construction defect and home warranty claims, including water intrusion issues in Florida; (xvi) the cost and availability of insurance and surety bonds, as well as the sufficiency of these instruments to cover potential losses incurred; (xvii) the performance of our unconsolidated entities and our unconsolidated entity partners; (xviii) the impact of information technology failures or data security breaches; (xix) terrorist acts, natural disasters, acts of war or other factors over which the Company has little or no control; or (xx) the impact on homebuilding in key markets of governmental regulations limiting the availability of water. Any forward-looking statement speaks only as of the date on which such statement is made and, except as required by law, we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for management to predict all such factors.

# Capital Efficiency Strategies: Land Banking & ROA

- The Gross Margin impact related to the cost of using land bank financing is typically ~400bps, or ~20% of the Gross Margin
- Revenue/Capital turnover benefit is typically 2x, or 100%
- As a result, land banking is significantly ROA accretive
- For FY18, our % of closings from land banking will be up versus the prior year
  - Based on our current portfolio of land banked deals, we do not expect a material impact on the Company's Gross Margin relative to current levels
